An emotive and exhilarating tale about human ingenuity and our natural resources. In *Zephyr –A Whirlwind of Circus* by *Cirque Mechanics*, audiences will witness the tug of war that exists between man and nature, in the name of progress.

Humans have been harnessing the power of the wind for thousands of years. The beauty and efficacy of that timeless and ingenious process inspired the creative team at *Cirque Mechanics* to create *Zephyr*, a theatrical circus show that harnesses human power, instead of wind, to generate an energetic acrobatic experience.

Cirque Mechanics has designed and built a performance windmill to serve as the multifunctional mechanical centerpiece of our story. Mounted on a turntable, the windmill combines both modern and older more picturesque elements – with the transformation from one aspect to another providing a change of scenery in real time.

Inspired by a visit to a working windmill in central England, *Zephyr* (which means gentle breeze from the Greek god of the west wind Zephyrus) tells the story of Nigel, mill owner and operator, and his complicated relationship with wind, the natural resource that powers his flour mill. His reliance on wind is tested and in turn he is lured by fuel in the name of progress as his primary energy source. His choices cause elation and disruption, aptly represented by the community the mill serves as dynamic and lyrical circus acts. Nigel grapples with tough choices and unintended outcomes with humor and optimism, which lead to acceptance, coexistence and balance with wind, progress, and his community.

Please note there will be a 20-minute intermission

LAND ACKNOWLEDGEMENT

We should take a moment to acknowledge the land on which we are gathered. For thousands of years, this land has been the home of Patwin people.

Today, there are three federally recognized Patwin tribes: Cachil DeHe Band of Wintun Indians of the Colusa Indian Community, Kletsel Dehe Wintun Nation, and Yocha Dehe Wintun Nation.

The Patwin people have remained committed to the stewardship of this land over many centuries. It has been cherished and protected, as elders have instructed the young through generations. We are honored and grateful to be here today on their traditional lands.

ABOUT THE ARTISTS

CHRIS LASHUA

FOUNDER – CREATIVE DIRECTOR – PRODUCER – MACHINE DESIGNER

Company founder, Chris Lashua, hails from Boston, Massachusetts, where he spent most of his youth riding on a BMX bike. He was discovered by Cirque du Soleil and created/performed a BMX bike act that was entirely his own. He was then commissioned to build a “German Wheel” act for the company, an act he performed for several years in Cirque du Soleil’s production of “Quidam”, cementing his reputation as a visionary of circus gadgetry. His engineering chops and creative energy led him to ‘run away’ with his own circus company, Cirque Mechanics.

Chris believes that innovative mechanical apparatus and the relationship between performer and machine sets his company apart and is at the heart of what makes Cirque Mechanics unique. Chris has delivered on this unique approach in the company’s theatrical productions. His innovative machines interact with acrobats, dancers, jugglers, and contortionists on a 1920’s factory floor in *Birdhouse Factory*, a gold rush era town in *Boom Town*, alongside renowned symphonies in the *Orchestra Project*, in a bicycle shop in *Pedal Punk* and inside a circus ring in *42ft A Menagerie of Mechanical Marvels* and now inside a countryside windmill in *Zephyr, A Whirlwind of Circus*.

Chris adapted to the pandemic restrictions by developing and presenting two new projects, an outdoor, socially distanced, pandemic compliant show at a Las Vegas golf course, where guests sat on the green and inside golf carts under the stars titled the *Cirque Mechanics Drive- n-Dine* and a stunning spectacle inside the company’s new custom orange and grey circus big top he called *Cirque Mechanics Under Canvas*.

Chris continues to build on the might of his engineering mind, his passion for the circus and all things mechanical by designing performance apparatus in real world settings that amaze and awe. When Chris is not developing material for a theatrical show, he is building other wacky performance devices for events, like the Paddle ship, a portable stage that not only floats, but also can be navigated by pedal powered paddle wheels and innovative hospitality devices like the Wine Trike, and Buffet Train, which double as pedaled performance platforms and fare delivery apparatus.

Chris is a producing partner of the Vegas International Variety Arts Festival (VIVA Fest), a Founding Board Member of the American Circus Alliance (ACA), Founding Member of the Producers Alliance of Southern Nevada (PALS) and was a featured guest lecturer at the annual Association for Theater in Higher Education Conference.

AIDA LASHUA

PRODUCER - COLLABORATOR

Aida has been Chris’ co-producer and creative partner in life and work for nearly 30 years. Their partnership includes a decade of touring and work experience with Cirque du Soleil (CDS) as well as fifteen years running their own company, Cirque Mechanics.

Aida worked for CDS sponsor AT&T, implementing their multi-million-dollar sponsorship agreement on tour, which included product placement, sales staff training and supervision of special sales promotions. She also worked as a Box Office Supervisor and House Manager for CDS, where she trained and managed a staff of sixty and implemented customer service policies, helped develop and revise training manuals and VIP Package tests.

Thanks to her experience with CDS, Aida has an appreciation for the business and a passion for the circus arts. She currently manages the day-to-day operations of Cirque Mechanics and family with poise, she is a creative force and a stabilizing influence. Aida’s education and background in direct marketing allows her to use a targeted message approach in the development of the company’s website and social media presence. As a mother of three boys, Aida is an avid supporter of the educational component and community outreach programs offered by Cirque Mechanics. She has written the education outreach support materials and study guides, as well as developed the structure of the educational workshops. Aida, who is a native of Puerto Rico, feels most at home near the ocean. She is a contributing writer for CityLife Publications and hopes to one day publish that elusive next great American novel.

Her expertise has been used in the films “Water for Elephants” and “Pitch Perfect 2.” She was featured on the cover of Dance Teacher Magazine for her expertise in circus-arts. Speaking engagements include TEDx, Center Theater Group, Directors Lab, Chicago Circus Festival, AYCO and VIVA Fest Las Vegas. Aloysia’s creative journey with Cirque Mechanics began at its inception with its premier show, *Birdhouse Factory*, in 2004. Her expertise of integrating CM trademark architectural machines with circus bodies in motion remains an integral part of the company. A vintage fun memory: in 1999 Aloysia & Chris rode their bikes through Amsterdam after their performance in *Quidam* to see Lauryn Hill in concert.

SEAN RILEY

They developed a love for historic costuming early on and was the head costume designer for four different Shakespeare productions before the age of 21. Since then, Kalin has spent their time when not working as a performer, making costumes as a freelance designer, but more recently is expanding their knowledge base by pursuing a degree in mechanical engineering from UNLV’s Howard H. ABOUT CIRQUE MECHANICS

Cirque Mechanics, which calls Las Vegas home, was founded in 2004 by Boston native and German Wheel artist, Chris Lashua, after the success of his collaborative project with the Circus Center of San Francisco, Birdhouse Factory. Cirque Mechanics quickly established itself as a premiere American circus, with its unique approach to performance, inspiring storytelling, and innovative mechanical staging. Spectacle Magazine hailed it as “the greatest contribution to the American circus since Cirque du Soleil”.

Cirque Mechanics, although inspired by modern circus, finds its roots in the mechanical and its heart in the stories of American ingenuity. The shows, rooted in realism, display a raw quality, rarely found in modern circus, that makes their message timeless and relevant. The stories are wrapped in circus acrobatics, mechanical wonders, and a bit of clowning around. Cirque Mechanics applies these principles to their Events and Under Canvas divisions, bringing their brand of unique circus entertainment, awe, and amazement, to corporate and private clients, as well as families inside their custom, orange and gray, big top.

The troupe has created a series of extraordinary touring theatrical productions, Birdhouse Factory, Boom Town, Pedal Punk, the Orchestra Project, 42ft – A Menagerie of Mechanical Marvels and for this season, *Zephyr – A Whirlwind of Circus*.

A SPECIAL MESSAGE FROM OUR PRESENTING SPONSOR, NANCY FISHER:

“The Robert and Margrit Mondavi Center for the Performing Arts represents an important lifestyle that defines the Davis Community. I am so impressed with the talented and versatile programs they bring to our community from all over the world that create truly exciting performances.

I am so grateful to give back through ‘The Nancy and Hank Fisher Family Fund.’ Please join me in attending the many programs of your choice and making your own financial gift supporting our treasured performing arts center. Thank you.”

- Nancy Fisher

MONDAVI CENTER LEGACY CIRCLE
